The State and Prospects of Ukrainian Higher Education Development of the Sphere of Professional Training of Specialists in Field of Physical Culture and Sports

Sergiy MEDYNSKIY, Sergiy SHANDRUK

Lviv State University of Physical Culture, Lviv, UKRAINE

Abstract

The article deals with the problematic aspects of training of specialists in physical education and sport related to normative and legislative regulation of the field of Physical Culture and Sport in Ukraine. The Laws of Ukraine, Decrees of the President of Ukraine, Decrees of the Cabinet of Ministers of Ukraine, orders, letters, explanations and recommendations of the Ministry of Education and Science are considered. The uncertainties and inconsistencies in the legislation on educational field of Physical Education and Sports, the regulation of the curriculum structure, the normalization of the number of required class hours per ECTS credit are presented. The survey on possible directions of the industry development using the US experience of instructors of higher educational institutions of Ukraine and specialists in physical culture was conducted.

In order to determine perspective directions of implementation of American experience of professional preparation of specialists in physical education and sports in Ukraine we conducted interviews among teachers of higher educational institutions of Ukraine. Interviews covered 184 higher education instructors involved in preparation of specialists in physical culture and sports. The respondents were: 25 instructors of Vinnytsia Mykhailo Kotsiubynskyi State Pedagogical University; 27 instructors from the Faculty of Physical Education and the Faculty of Olympic and Professional Sport of Dnipropetrovsk State Institute of Physical Culture and Sports; 31 instructors of Lviv State University of Physical Culture; 29 instructors of the National Pedagogical Dragomanov University; 26 instructors from the Faculty of Physical Education of Ternopil Volodymyr Hnatyuk National Pedagogical University; 28 instructors from the Faculty of Physical Education of Chernihiv National Pedagogical University named after T.G. Shevchenko; 18 instructors from the Faculty of Physical Culture and Human Health of Yuriy Fedkovych Chernivtsi National University.

The study of professional training in physical education and sport in the United States of America gives reason to hope that implementation of promising directions for the training of specialists in physical education and sports will contribute to the qualitative improvement of professionalism and competence of specialists in the Sports and Sports Industry in Ukraine. We consider the perspective directions of implementation of experience of professional training of specialists in the Sports and Sports Industry of the USA in Ukraine as follows: restoration of the educational industry "Physical Culture, Sports and Health"; extension of the list of specialties, according to which training of specialists in the sphere of physical culture and sports will be conducted.
